1 MS. HIGGINS: It is hard to tell at
2 this point, Your Honor, because I haven't heard
3 the rest but so far, yes.

4 JUDGE SHAW: Well, I would like to --
5 I think if your examination ends at 6:00
6 o'clock, that may not really provide her enough
7 time this evening, so we will see if we can
8 bring it in well before that.

9 MR. LEWIS: I will certainly try and
10 expect to.

11 BY MR. LEWIS:

12 Q. So in encoding, the scan path is
13 applied to the coefficients after they are
14 quantized, right?

15 A. Strictly speaking, it need not be.
16 Those operations can be interchanged.

17 Q. The goal of the scan path is to group
18 the zeros, right?

19 A. That wouldn't be affected by whether
20 you quantized first or scanned first.

21 Q. The quantization creates a lot of
22 zeros, doesn't it?

23 A. It may create some zeros.

24 Q. So you would want to group the zeros
25 after you create them, right?
